1. Test Case 1: UC-10: Login to Web Application

Description

The purpose of this test case is to verify that the user can search for nearby vending machines, or filter vending machines using the mobile application. With this test case search and filter functionality will be tested in related test steps.

Pre-conditions

The user has a Vendomatic Mobile Application installed on their device.
The user has granted the necessary location permissions.

Post-conditions

The user views a list of vending machines based on filters and can select one to view more information.

Data Required

1 user account is used for this test case.

2. Test Case 2: UC-11: Rate Products and Vending Machines

Description

The purpose of this test case is to verify that the user can rate vending machines or products on mobile application. With this test case rate functionality will be tested in related test steps.

Pre-conditions

The user has a Vendomatic Mobile Application installed on their device.
The user is logged in to the mobile application.

Post-conditions

The user views ratings for a vending machine or a product.
The user submits a rating for a vending machine or a product which later becomes visible to other users.

Data Required

2 user accounts are used for this test case.
